

Physician Education Express

Important Cerner Enhancements

October 2017

Audience: Providers and Pharmacists

Education Level: RED

Effective: October 2, 2017

Overview:

Effective October 2, 2017, the IS Uplift project is standardizing how specialties use Cerner. Please access the information below with links to videos and printable documentation (updates) to review important Cerner enhancements. This will affect the Uplift Standard Workflows, Dynamic Documentation and includes Discharge Medication Reconciliation Enhancements.

Uplift Standard Workflows

These workflows show the specialty views in Cerner with a new look and feel that provides access to new chart review, documentation and ordering tools which contains highlights of the new tool Dynamic Documentation.

Dynamic Documentation

The new tools highlighted in the MPage video allow you the option to use dynamic documentation. PowerNote is still available; however, the label has been changed to "Documentation." The functionality in your workflow screens will help you complete documentation.

------------------------------------	---

Discharge Medication Reconciliation Enhancements

New buttons on the Outpatient and Discharge Medication Reconciliation windows reduce clicks and overall time spent in Medication Reconciliation.
