

Push Dose Pressor (PDP) Compounding Instructions

EPINEPHrine 10 mCg/mL (10 mL syringe)

Supplies:

- One normal saline flush (10 mL)
- One epinephrine 1 mg syringe (syringe used for ACLS)
- One luer lock 10 mL syringe (empty)
- Tape/marker to label PDP syringe
- IPA caps (green)

Steps:

1. Perform hand hygiene and put on clean gloves.
2. Open the EPINEPHrine Bristoject syringe box (syringe used for ACLS). Prior to connecting the two pieces, draw up 1 mL into the empty 10 mL syringe.
3. Then add 9 mL of saline from the flush syringe to the 1 mL of EPINEPHrine for a final concentration of 10 mCg/mL.
4. Add green cap to syringe and label with the drug name and concentration.
5. Syringe is good for 1 hour after preparation.
