Effective Date
October 31, 2023

Topic:	Uplift Blood Orders CPOE Updates for Clarification
Facility:	IU Health Inpatient, Emergency Departments, Ambulatory Clinics, and Blood Bank
Audience:	Providers, Nurses, and Other Staff Who Order, Prepare, or Administer Blood Products
What:	<i>Reviews updates to education regarding blood products for the Uplift Blood Orders CPOE project.</i>
Why:	<i>Inform staff of clarifications to questions received regarding blood product orders.</i>

Requests for Blood Products

The **Academic Health Center (AHC)** will continue their current process of requesting **Emergent** and **Mass Transfusion Protocol (MTP)** blood products through phone call.

Physician Sign-off of Emergent and Mass Transfusion Protocol Product Orders

All **Emergent** and **Mass Transfusion Protocol (MTP)** blood product orders must have Physician sign-off in Cerner. APPs should send these orders for co-signature or propose the orders if they are the first to order.

Blood Bank Notification

AHC will be the only location that utilizes **DiagNotes** for notification to **Blood Bank** of an **MTP** or **Emergent** blood product orders.

HgbS Negative Products Clarification

As a clarification to previously published education regarding products being **HgbS negative**, all products are **NOT HgbS negative**.

Note: This is a clinical update, IS Education is not responsible for this education. Please contact **Blood Bank** with any clinical questions.

CMV Negative Indications Clarification

As a clarification to previously published education regarding **Malignancy** being an indication for **CMV negative** products, **Malignancy** is **NOT** an indication for **CMV negative** products.

Note: This is a clinical update, IS Education is not responsible for this education. Please contact **Blood Bank** with any clinical questions.
